Allowable Subject Matter

1. **The following is a statement of reasons for the indication of allowable subject matter:**

The present invention is directed towards to intelligent automation of a reminder and/or calendar system for a wireless PDA device. The invention further discloses a method comprising a PDA device with a proximity detector substantially within the PDA device in communication with a reminder application to detect proximity of said wireless PDA to another wireless PDA. Further, the said reminder application is automatically transferred to said another wireless PDA device when a detected proximity to said another wireless PDA device is less than about a pre-established threshold.

The closest prior art Tanaka discloses a method for connecting proximately located mobile users based on compatible attributes. Tanaka however discloses a method wherein it relies on a cellular telecommunications network to determine a proximity to another device.

Tanaka individually or in combination with a secondary reference does not disclose or suggest using the PDA device itself to determine a proximity to another PDA device to send a reminder.

Therefore the independent claim 24,31,35,39,43 and their dependent claims are allowed in light of the applicant's arguments in applicant's response dated 7/19/06.

EXAMINER'S AMENDMENT

The application has been amended as follows:

Claim 46 shows dependency from claim 46, which is an error. However, claim 46 is an apparatus claim therefore should be dependent on the independent system claim 43. Appropriate correction in the dependency of the claims must be submitted.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
